

GENDERING DISASTER RISK REDUCTION - KEY RESOURCES

The Gender and Disaster Network urges all actors responding to the Haitian earthquake to adopt a gender-responsive approach that builds on women's capacities and resources while reflecting the gender-specific needs of women and men, boys and girls. We offer these resources for planning and advocacy and a better understanding of the need for gender-aware approaches to disaster risk management. For additional resources, please visit the Gender and Disaster Sourcebook >> Policy and Planning Tools: <http://www.gdnonline.org/sourcebook/chapt/ind.php?id=2>.

First, visit MADRE [<http://www.madre.org/index.php?s=4&news=2>] and GROOTS/Disaster Watch: <http://www.disasterwatch.net/index.html> to learn how they are working with grassroots women in Haiti and the region.
