1 Pwata ei appos mei auchea?

Influenza (“flu”) ew sakkun menun samwaw mei kan nonom non Merika atun fansoun winter, seni maramen Oktoper tori Mei.

Semwinin flu a etto ngeni kich seni ewe influenza virus, o a kan chooufetan pokiten mwor, mwesi, are seni ach nom aron emon mi semwen are fen pwan nom ren.

Emon me emon epwe tongeni semwin ren flu, nge mei watten osukosuk ngeni semirit. Osukosuken flu ekan tongeni nonom tori wukukun ruu ika aunungat ran. Mei pachengeni:

- pwichikar/fefew
- metekin chior
- cheuch
- apwangapwang
- mwor
- metekin mokur
- mongomong non pwet

Semwinin flu ekan tongeni pochokun ika pwetete ngeni emon me emon. Mei ngaw ngeni ekkewe mi kukkun, me ekkewe mei nap seni 65 ierir, me ekkewe re pwopwo, pwan ngeni ekkewe mei fen semwin ren och osukosuken inis— usun semwinin ngas, ammat ika kipwin, are ika och sakkun apwangapwangan inis. Ei apposun flu mei fokkun namot ngeni ekkei aramas.

Semwinin flu epwe pwan tongeni chooufetan me siwini ngeni semwinin niumonia. Mei pwan mechères an emon semirit epwe semwinin feinseni me seizure (weiwei).

Iteiten ier non Merika **mei wor fokkun chommong aramas ir mei kan mano**, o ra pwan tonong non ewe pioing pokiten semwinin flu.

Epetin apposun flu mei nap seni pwan ekkoch fofoen epetin flu. Apposun flu mei pwan epetin emon me emon pwe ewe samwaw ese fokkun chooufetan.

2 Apposun epetin flu, ese manaw (inactivated)

Mei wor ruu sakkun fofoen epetin flu:

Ikenai en kopwe angei apposun flu, **ese manaw**, wewen, ewe apposun flu ese pachenong ekkoch menun virus mei manaw nge ekan inactivated. Sipwe ngonuk ewe saffei meren efoch tikekin appos, iwe sia iteni “flu shot”.

Ewe orruan sakkun fofoen epetin flu mei manaw, nge a kan spray non pwetach, nge **a apwangapwang** seni epetin Influenza (inactivated) VIS - Chuukese (7/26/13)

appos (ekkis chok). *Mei wor pwan ew toropwen Porausen Epetin Samwaw faniten ei orruan sakkun fofoen epet.*

Mei namot ach sipwe angei apposun flu iteiten ier. Semirit maram 6 tori ier 8 repwe angei ewe appos fan ruu atun aewin ierir.

Semwinin flu e keran soposopono me akasiwin fansoun meinisin. Iteiten ier mei wor apposun flu mei minafo pokiten ekkewe siwin. Nupwen sia angei apposun flu, a kan anisikich pwe sipwe pochokun, o a kan mamasa kich seni ewe samwaw. Ei sakkun apposun flu (ewe appos “ese manaw”) a keran pochokun ngeni 3 ika 4 sakopaten semwinin flu.

Ewe appos epwe poputani epetin ewe semwinin flu murin wukukun 2 wik, me epwe pochokun fan wukukun ekkoch maram tori ew ier.

Mei wor ekkoch sakkun samwaw mei ekkis nono ngeni ewe semwinin flu. Ewe apposun flu ese tongeni epetin ekkewe samwaw. A men tongeni epetin semwinin flu chok. Faniten ekkewe mei nap seni 65 ierir, mei wor ew apposun epetin flu mei watten pochokun, a iteni “high dose”. Ewe chon awora mei tongeni esine ngonuk porausan ekkei fofor. Mei pachenong ekkis thimerosal (ew sakkun mercury ren preservative) non ekkoch apposun flu. Thimerosal ese afeiengaw ngeni kich, nge ika kese mochen angei appos mei pachengeni thimerosal, en mei tongeni tingor pwe kopwe angei ew appos ese pachenong ena sakkun preservative.

3 Ei sakkun appos mei ngaw ngeni ekkoch aramas

Kopwe esine ngeni ewe chon awora appos:

- **Ika mei wor om allergy (wewen, saffei ika mengi mei ngaw ngonuk)**, o mei pwan pachenong ngeni allergy ren sokun. Ika och sakkun appos mei ngaw ngonuk me noom, kopwe ereni ewe chon awora appos pwe epwe tongeni finata ika epwe och ika epwe ngaw ngonuk.
- **Ika emon a fen semwin ren Guillain-Barré Syndrome** (ew watten samwaw mei fokkun apwangapwangan inis, e pwan iteni GBS). Iwe, ei appos epwe tongeni afeiengaw ngeni emon chon semwinin GBS. Kosemochen kopwe kapas ngeni noum tokter usun ekkei poraus.
- **Ika kese meefi och.** Ika ka meefi ingaw, iwe kopwe witiwit tori fansoun kopwe pochokun sefan. Nge kosemochen kopwe niwinto angei.
